The Sherbrooke Research Center on Aging is organizing its second international Symposium on the Biology of Aging. After the success of its first theme “*from Cells to Clinics*” this Symposium aims at exchanging on the topic of healthy aging and associated pathways. Leading experts will present their newest research. Come to Montreal to learn more about the biology of aging in the sessions we are organizing.

Full program at www.cdrv.ca/symposium

- Session 1: Immunosenescence, Inflammation and Vaccination
- Session 2: Longitudinal studies/cohort studies
