

Systems Toxicology 2013 - From Basic Research To Human Risk Assessment

Centro Stefano Franscini, Ascona, Switzerland, 28 April - 1 May 2013

This international innovative and highly interactive 3-day workshop combines cutting-edge basic science with discussion and debate platforms, to address relevant current concerns for researchers and regulators in human toxicology. It will take place at the Centro Stefano Franscini, a conference center of the ETH Zurich, situated in Ascona, Switzerland on a hillside above Lago Maggiore.

Representative speakers:

Robert Kavlock, EPA Office of Research & Development, USA

Maurice Whelan, JRC and ECVAM, EU

Thomas Hartung, Johns Hopkins, USA

François Pognan, Novartis Institutes for BioMedical Research, Switzerland

Thomas Singer, F. Hoffmann La Roche Pharmaceuticals, Switzerland

Joost van Delft, Maastricht University, Netherlands

Gustavo Stolovitzky, IBM Research, USA

Stephen Rappaport, University of California, Berkeley, USA

Alan Boobis, Imperial College London, UK

Marcel Leist, University of Konstanz, Germany

Student travel grants available!
